

Welcome from Program Chair

IWQoS 2018 received 125 submissions for its main technical program. Based on hard work from our 44 TPC members and 3 volunteer reviewers (Dr. Ruiting Zhou, Dr. Xiaoxi Zhang and Dr. Jingpu Duan), each submission received 3 to 4 reviews. Eventually, 26 papers are accepted for publication as regular papers, and 25 as short papers.

We are also happy to accept another 16 posters for on-site presentation. This year's event starts to witness applications of latest developments in AI, including deep learning in particular, in networking systems.

We hope you will enjoy the technical program and the stay in Banff! We wish to thank all the TPC members and the reviewers for their insightful input that help shape the program. We are also indebted to the organizing committee, including Dr. Carey Williamson, for making the event possible and successful!
